Treater has been isolated and shut in until issue can be resolved. Impacted vegetation will be mowed and recovered. Impacted soils will be removed.

Wastes Disposal Location: Approved landfill

Agencies Involved:

Updates

Date: 3/10/2014 **Status:** Inspection

Author: Miller, Adam

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

Estimated areal extent is 100ft by 100ft. Sprayed area is on a steep side hill. Spoke with HSE coordinator on the location to discuss remediation. Advised that a burn was possible with appropriate permits and notifications. Cutting and bagging vegetation also an option. Company will contact NDDoH with plan and a re-inspection will have to take place after company actions.

Date: 3/10/2014 **Status:** Reviewed - Follow-up Required

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

Report indicates a treater popoff that was not contained. Followup is required.

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

Arrived on site at 2:00 p.m. Weather was sunny with wind out of the south at 15 mph. Temperature was 88 degrees F. The area of impact was located south and east of the flare. The terrain in that area is a small rise into a very steep downward slope. The hill is very well vegetated. Due to the gradient of the slope, any removal of vegetation or dirt material would cause additional issues with erosion and stabilization. This area is badlands terrain with good vegetation cover. No additional follow-up needed for site.
